Product description

AIO5W-H omni-directional LTE antenna is working in Vertical polarization, it's desired for 2G/3G/4G LTE connections.

The antenna can be used for many popular LTE bands and it covers the frequency range 900-2100 MHz. That antenna is predicted to be installed directly on the repeater as the distribution antenna. It's compatible with all Rangeful repeaters and other 2G/3G/4G LTE repeaters and modems.
