

Specifications

Frequency Range	698-2700 MHz
Supported Standarts	2G, 3G, 4G LTE, Wi-Fi
Splitter Loss	6 dB
Insertion Loss	≤ 0.5
Directivity	≥ 20 dB
Inter-modulation	≥ 140dBc (2 * 43 dBm)
Input Power	up to 50W
Connector Type	N-Female
Impedance	50 Ω
VSWR	≤1.25
Operating t °C	-35 / +60
Operating Humidity	5 - 95 % Noncondensing
Housing Finish	Painted, Black
Dimensions	120 * 110 * 22 mm
Weight	0.28 kg

Product Description

Splitter is a device designed for equal division or combination of signal power in a cellular amplification system. Usually the splitter is used to connect additional antennas and/or devices.

This signal splitter is necessary if four indoor antennas are used to provide a similar power cellular signal to four rooms, for example.
